DETAILED ACTION

This is the **Final Office Action** for application number 10/711,100 Radio Bin Spacer, filed on 8/23/04. Claims 1-17 are pending. This **Final Office Action** is in response to applicant's reply dated 4/4/07. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

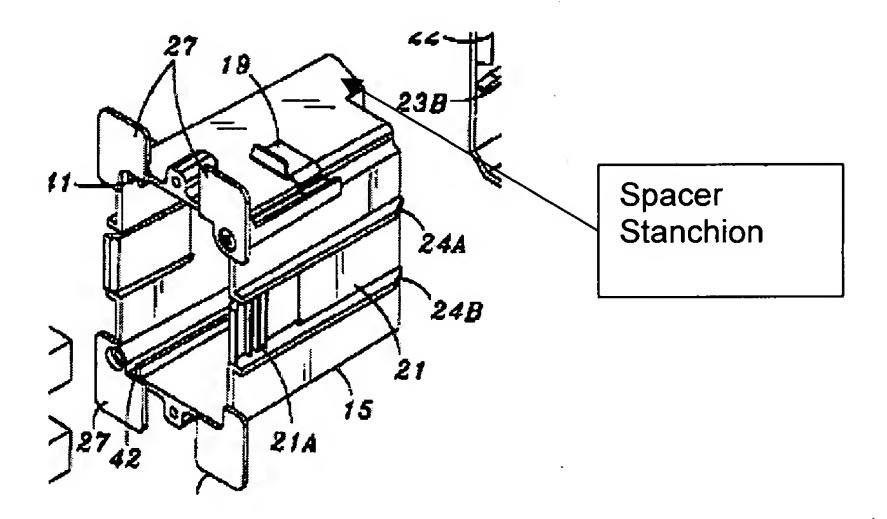

Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action.

Claim Rejections - 35 USC § 103

Claims 1 and 10 rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent No. 6533225 to Berges et al. in view of United States Patent No. 5542175 to Tsai.

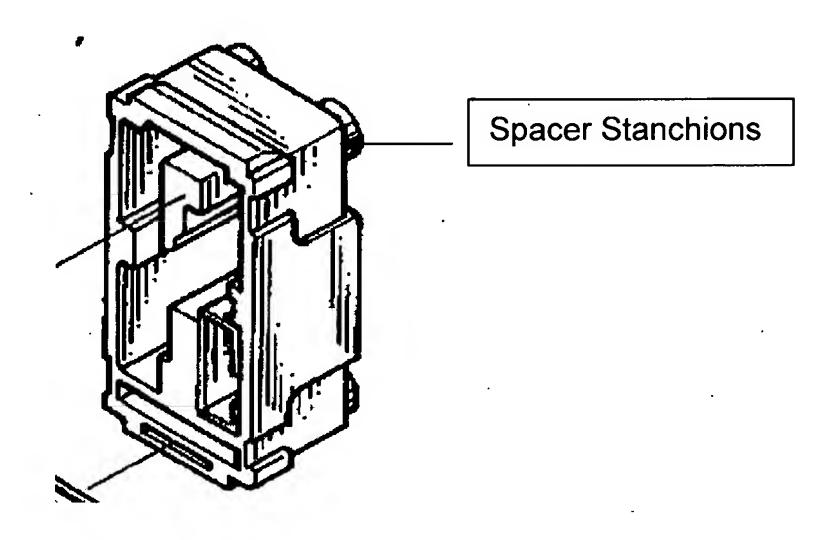

The patent to Berges discloses a device having a bin (21) having one closed end and open end and further having a top wall with a structural rib (24a), a bottom wall and two side walls having a mounting tab (27) located thereon, the tab having a bore therein, the rear end having a spacer stanchions (See Below) located thereon, the bin having an exterior dimension allowing mounting within an instrument panel opening designed for a larger than standard sized radio and further having interior dimension allowing mounting of a standard sized radio directly therein.

Art Unit: 3632

The patent to Berges et al. does not disclose a pair of spacer stanchions on the rear wall.

The patent to Tsai teaches a mounting device having a closed rear wall which has a pair of spacer stanchions thereon, the pair used as a design choice to space the rear wall from the desired device.

Art Unit: 3632

Therefore it would have been obvious to one of ordinary skill in the art to have used a pair of spacer stanchions in order to have the rear wall spaced as desired by a design choice.

Claims 2-7 and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent No. 6533225 to Berges et al. in view of United States Patent No. 5542175 to Tsai and further in view of United States Patent No. 6330121 to Kobayashi et al.

Berges et al. and Tsai disclose applicant's basic inventive concept, all the elements which are shown above with the exception that it does not show the specific materials of plastic, polypropylene, thermoplastic olefins, butadiene and polycarbonate.

Kobayashi et al. teaches a mounting device for a optical device which is made of plastic, polypropylene, thermoplastic olefins, butadiene or polycarbonate (See Col.12 lines 24-29 for material), the materials used for their resilient and strength properties. Therefore it would have been obvious to one of ordinary skill in the art from the teachings of Kobayashi et al. to have made the device of these materials in order to have a resilient and strong device.

Claims 8, 9, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent No. 6533225 to Berges et al. in view of United

Art Unit: 3632

States Patent No. 5542175 to Tsai and further in view of United States Patent Publication No. 2005/0231954 to Czech.

Berges et al. and Tsai disclose applicant's basic inventive concept, all the elements which are shown above with the exception that it does not show the specific materials of aluminum and metal.

Czech teaches a mounting device for a optical device which is made of aluminum metal (See page 2, paragraph 0023 for material), the material used for their strength properties. Therefore it would have been obvious to one of ordinary skill in the art from the teachings of Czech to have made the device of these materials in order to have a strong device.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3632

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action. Any inquiry concerning this communication should be directed to Amy J. Sterling at telephone number 571-272-6823. The fax machine number for the Technology center is 571-273-8300 (formal amendments) or 571-273-6823 (informal communications only). Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center receptionist at 571-272-3600.
